Upper body hypertrophy — Session B

Focus block · 9 targets · shoulder, elbow, wrist at loading stage 2 · spine at 1 · ~38.5 min · 24 working sets

Muscle group

Chest · Front delt · Side delt · Rear delt · Back · Biceps · Triceps · Abs

Before: upper mobility routine, pre half · then 1–2 light warm-up sets
Outside the exercise time (R19) · use current working loads; new exercises start at the stated RIR

A — Superset 1: Upper back + Chest (~10 min · 3 rounds · 60–90 s after each pair)

1 **Chest-supported dumbbell row (incline bench)** — 3 × 10–12
Upper back (S) · lats, biceps and rear delt assist
Elbows to or just past the torso line · arms together
3 RIR · wk 5+: 2
DB + bench

↕ then immediately

2 **Band crossover (long bands anchored high)** — 3 × 12–15
Chest (S) · start with the arms short of the torso plane
Hands meet at mid-chest · soft elbow · arms together
2 RIR · wk 5+: 1
2 long bands + frame

B — Superset 2: Lats + Lower traps (~10 min · 3 rounds · 60–90 s after each pair)

3 **Dumbbell pullover on the bench** — 3 × 10–12
Lats (L) · chest and triceps assist · ⚠ free DB overhead (R6)
Blades braced · lower to ~70–80% of flexion, short of the ears
2 RIR · wk 5+: 1
DB + bench

↕ then immediately

4 **Prone Y raise (floor, light dumbbells or none)** — 3 × 12–15
Lower and mid traps (S) · thumbs up, arms in a Y · no shrug (R8)
Blades braced, short of end range · shoulder unstable → straight (R9)
2 RIR · wk 5+: 1
Floor · light DBs

C — Superset 3: Biceps + Front delt (~10 min · 3 rounds · 60–90 s after each pair)

5 **Hammer curl, both arms (neutral grip, standing)** — 3 × 10–12
Biceps and brachialis (M) · soft elbow at the bottom
Elbows at the sides · both arms together · no swing
2 RIR · wk 5+: 1
Dumbbells

↕ then immediately

6 **Dumbbell front raise, both arms** — 3 × 12–15
Front delt (S) · chest assists · thumbs up · stop at shoulder height
Soft elbow · both arms together · no torso swing
2 RIR · wk 5+: 1
Dumbbells

D — Superset 4: Side delt + Abs (~10.5 min · 3 rounds · 60–90 s after each pair)

7 **Dumbbell lateral raise, both arms** — 3 × 12–15
Side delt (S) · raise to 80°, just below shoulder height
Soft elbow · both arms together · no shrug
2 RIR · wk 5+: 1
Dumbbells

↕ then immediately

8 **Dead bug hold, both arms and both legs up** — 3 × 48–60 s
Abs (M) · low back flat; arms over shoulders, hips 90°
Progress: straighten both legs only while the back stays flat
8 s in reserve · wk 5+: 4
Floor

After: mobility post half · day after: no archery
Chest, delts, back, triceps and abs collect sets here — archery's day-before muscles (R21)
Next day, train only if that morning's step gate passes for every joint both sessions load (R20)

Every rep, every set — hypermobility rules

- Lower every rep over 2–3 s; keep a soft bend at every joint, no lockout (R25 · R2)
- Peak effort at ~70–80% of your range, never end range: stage 2 opens full range, not end range (R1 · R3)
- Skip the session if joints feel loose; end a set the moment a joint feels unstable (R9)
- Weeks 1–4: compounds 3 RIR, isolation 2 RIR; from week 5: 2 and 1 (R18) — week 1 = your first session
- Both arms together on every exercise: one-arm work waits for loading stage 3 (R12)
- Holds: end ~8 s before failure (wk 5+: ~4 s); too easy at 60 s → harder variant, not longer (R16)
- Progress: top of the rep range twice → your smallest load step, reps back to the bottom (R42)
- Log the step gate after each session; a fail repeats last week's dose for that joint (§2.6 · R43)

Session timeline

Mobility pre half → warm-up sets → A → B → C → D → mobility post half
Exercise time ≈38.5 min (R40: 4 s a rep, top of every range, 90 s after each pair) · 24 working sets

Working sets — here · week (direct + half-sets from compounds) · ≈10 a target (R33)

Chest 3 · week 10
Front delt 3 · week 7 + 3.5
Side delt 3 · week 10
Rear delt 0 · week 7 + 3
Lats 3 · week 7 + 3
Upper back 6 · week 9 + 2 (1 above, R48)
Biceps 3 · week 7 + 5
Triceps 0 · week 7 + 3.5
Abs 3 · week 10

Alternatives — if a station is taken (each avoids the primary's stations, R41)

#	Primary exercise	Alternative 1	Alternative 2
1	Chest-supported DB row	Band wide row (anchored low)	Wide-grip cable row
3	DB pullover	Cable pullover (M: no L off-bench)	Straight-arm band pulldown
